Exercicio splash na tela do nosso projeto

- codigo do splash no projeto

```dart
import 'dart:async';
import 'package:flutter/material.dart';
import '../../core/theme/app_theme.dart';

class SplashScreen extends StatefulWidget {
  const SplashScreen({super.key});

  @override
  State<SplashScreen> createState() => _SplashScreenState();
}

class _SplashScreenState extends State<SplashScreen> {
  @override
  void initState() {
    super.initState();

    // Timer de 3 segundos
    Timer(const Duration(seconds: 3), () {

      if (mounted) {
        Navigator.pushReplacementNamed(context, '/login');
      }
    });
  }

  @override
  Widget build(BuildContext context) {
    return Scaffold(

      backgroundColor: AppColors.background,
      body: Center(
        child: Column(
          mainAxisAlignment: MainAxisAlignment.center,
          children: [
            const Icon(
              Icons.content_cut,
              size: 100,
              color: AppColors.primary,
            ),
            const SizedBox(height: 24),
            const Text(
              'BARBÚ',
              style: TextStyle(
                color: AppColors.textPrimary,
                fontSize: 24,
                fontWeight: FontWeight.bold,
                letterSpacing: 8.0,
              ),
            ),
            const SizedBox(height: 30),
            const CircularProgressIndicator(
              color: AppColors.primary,
              strokeWidth: 2,
            ),
          ],
        ),
      ),
    );
  }
}
```
